

# Cell Power Lucky 13 7-13-13 Technical

## Building Foundations

**Omex® Cell Power® Lucky 13** is a unique blend of nitrogen, phosphorus and potassium, plus a micro-nutrient pack, along with Kelp extract, which helps reduce abiotic stress during critical stages of plant development during the year. This blend has been formulated to maximize the production of crops at risk of damage from stress conditions caused by high temperatures, saline/sodic soil conditions, drought and overall lack of crop vigor. **Omex® Cell Power® Lucky 13** contains a full complement of micros which include iron, manganese, zinc, copper, boron and molybdenum to help with all the plant processes which include nitrogen metabolism, enzyme activation, pigment formation, root stimulation and other plant physiological activities.

## Benefits

**Cell Power® Lucky 13** can be used on its own or as part of an integrated nutritional package. It is best used as part of a planned nutritional management program.

**Cell Power® Lucky 13** is excellent at maintaining plant growth during situations of abiotic stress.

The combination of nutrients and stimulants produces excellent root growth, promoting a strong healthy plant, resulting in higher crop yield.

## Understandings

CellPower®Lucky13 is an effective stressbuster.

Expect a rapid visual improvement following application to crops under stress. When used as part of a nutrient management program, **Lucky 13** helps to create larger or bolder harvestable produce, resulting in higher crop yield.

Consult **Cell Power® Lucky 13** label for further crop specific recommendations.
