

Cell Power[®] Protein Plus[®] Vine MicroBlend

This unique blend of magnesium, iron and zinc is specifically formulated for grapevines. Coastal areas are known to have deficiencies of these three key nutrients, which are very important for optimum growth and development:

Magnesium: The central element in the chlorophyll molecule, as well as important for the translocation of phosphorus throughout the plant tissues.

Zinc: Essential nutrient critical in the formation of enzymes, especially IAA. **Iron:** Also essential in the formation of chlorophyll, as well as activation of other critical enzymes essential for the use of nitrogen by the plant.

This special blend contains protein hydrolysates, which aid the movement of these nutrients into the crop. This product may be applied as a foliar or through drip/micro irrigation systems. Use 1-4 quarts per acre and apply early in the spring and also when tissue and soil sample reports indicate a continued need. If you intend on blending with other liquid or dry fertilizers, a jar test is recommended to ensure compatibility.

Analysis: 0.6% Mg +3% Fe + 5% Zn

Density: 11 lbs/gallon

Packaging: 2.5-gal, 275-gal mini-bulk

Quality & Crop Safety is our #1 Goal
