

# Cell Power® N-Ergy

## Tech Sheet

### What is N-Ergy?

Cell Power® N-Ergy is a unique blend of stabilized amine nitrogen and potassium, designed to boost reproductive growth, enhance flower and fruit production, and increase harvestable crop portions for maximum yield and quality.

#### KEY BENEFITS:

- **Promotes Reproductive Growth:** Increases flowers and fruit.
- **Boosts Yield:** Larger harvestable portions of crops.
- **Enhances Quality:** Consistently larger and higher-quality produce.
- **Improves Water Efficiency:** Increases water conductance and use efficiency.
- **Strengthens Plants:** Thicker stalks and more resilient crops.

### Rates and Timings:

#### General Application:

- Rate: 1-2 quarts per acre
- Timing: Apply during key growth stages, such as flowering and fruit set.

#### Specific Guidelines:

- Initial Application: Apply at the beginning of the reproductive growth stage.
- Subsequent Applications: Reapply every 14-21 days throughout the growing season.

These guidelines help ensure optimal reproductive growth, enhanced flower and fruit production, and increased crop yields.

Please read and follow the specific application and usage guidelines on the label for best results.
