

## Cell Power® Coat-Tail 9-0-4 + 1%

Coat-Tail is a very unique form of stabilized amine nitrogen, enhanced with 1% Manganese to help your crops get off to a great start. The nitrogen in this material is a polarized Urea which does not breakdown to nitrate, thereby allowing the plant to use little to no energy to convert the urea into proteins within the tissues. Crops treated with glyphosate can go through periods of stress which delay plant development and growth. The use of Coat-Tail 9-0-4+1% in your foliar program or with your glyphosate program will lead to overall improved crop vigor, yield and quality of the crop. The use rates for this product are 1 to 2 pints/acre as a foliar with sufficient water to provide coverage. Nonetheless, a jar test is always recommended to determine compatibility with Coat-Tail 9-0-4 + 1% Mn. Contact your OMEX® Territory Sales Manager to see how you can incorporate Coat-Tail 9-0-4+1% into your crop nutrition program.

Analysis: 9-0-4 + 1% Manganese  
Density: 9.71 lbs./gallon  
Packaging: 2.5-gal, 265-gal mini-bulk

**Quality & Crop Safety is our #1 Goal**
