

Cell Power® Protein Plus 5.5% Iron

Iron is indispensable in plant energy capturing photosynthesis, as well as energy utilization during respiration.

Cell Power® Protein Plus 5.5% Iron contains protein hydrolysates which are essential in the formation of proteins within the crop. Foliar nutrition in the form of protein hydrolysates, provide read-made building blocks for protein synthesis. In addition, iron has restricted movement in plants, thus hydrolysates aid the mobility of this critical micronutrient into the target tissue where iron is required.

As a liquid, **Cell Power® Protein Plus 5.5% Iron**, plus protein hydrolysates is easy to handle and tank mix without the worry of clogging nozzles. This product may be applied as a foliar or through drip/micro irrigation systems. Use 1-4 quarts per acre, starting early in the season and during the growing season as tissue and soil sample results dictate. If you intend on blending this material with other liquid or dry fertilizers, a jar test is recommended to ensure compatibility.

Analysis: 5.5%Fe

Density: 10 lbs/gallon

Packaging: 2.5-gal, 265-mini-bulk containers

Quality & Crop Safety is our #1 Goal
