

Cell Power® Protein Plus 8% Zinc

Zinc is an essential constituent of several important enzymes within the plant. Lateral movement of zinc in the soil is highly dependent on soil moisture, which could be the reason why zinc deficiency is more frequently observed, particularly in arid and semi-arid areas. Especially when Microminor Zinc 8% is applied as a foliar, you can rest assured your crop zinc needs are met.

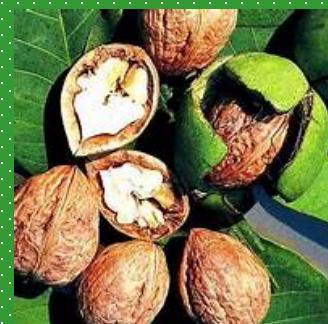

Cell Power® Protein Plus 8% Zinc contains protein hydrolysates which aid in the formation of proteins within the crop. Foliar nutrition form of protein hydrolysates, provide ready-made building blocks for protein synthesis.

Analysis: 8% Zn

Density: 10.5 lbs/gallon

Packaging: 2.5-gal, 265-gal mini-bulk

As a liquid, **Cell Power® Protein Plus 8% Zinc**, plus protein hydrolysates is easy to handle and tank mix without worrying about clogging nozzles. This material may be applied as a foliar or through drip/micro irrigation systems. Use 1-4 quarts per acre, starting early in the crop's development and during the growing season as tissue and soils indicate a need. If you intend on blending this material with other liquid or dry fertilizers, a jar test is recommended to ensure compatibility.

Quality & Crop Safety is our #1 Goal
