

Cell Power® Protein Plus Calcium 8%

Calcium is essential in maintaining cell wall strength and integrity. This nutrient is also important in the development of apical growth and tissue development. This formulation adds a new dimension by incorporating protein hydrolysates and a proprietary blend of seaweed extracts selected to improve cell development, water and nutrient mobility, and thus, help to mitigate stress.

Cell Power® Protein Plus Calcium 8% increases calcium levels in leaf and fruit tissue, thus maintaining the quality you look for during storage and transportation.

As a liquid, **Cell Power® Protein Plus Calcium 8%**, which includes protein hydrolysates and seaweed, is easy to handle and tank mix without the worry of clogging nozzles. Use 1-4 quarts per acre, starting prior to bloom and follow with additional applications as tissue and soil sample.

Analysis: 8% Calcium, 7-0-0

Density: 10.8 lbs/gallon

Packaging sizes available: 2.5-gal, 275-mini-bulk

Quality & Crop Safety is our #1 Goal
