

OrganOmex™ Achieve® 3-1-3

Building Foundations

OrganOmex™ Achieve® is a liquid nutritional supplement that incorporates a desert plant extract, plus OMEX's technology into its formulation. This combination of 3-1-3 provides unique benefits helpful to early plant development and vigor. Provides enhanced Early Season Growth, Complete Pollination, Increased Fruit Set, Increased Vigor, A-biotic Stress Relief, Enhanced Quality and Greater Yield.

Analysis & Tips

Extracting the enzymes and co-factors from desert plants enables them to be introduced into fertilizers and transform them to help plants tolerate a-biotic stresses better. This extraction process enables us to create fertilizers containing proprietary technology.

Incorporating Achieve® with your starter or foliar fertilizer program brings OMEX® Technology to your crop management plan. Plants acquire the enzymes and co-factors derived from this process and exhibit better overall reduction from abiotic stresses that the environment frequently imposes.

Timings and Rates

OrganOmex™ Achieve 3-1-3 is designed to deliver nitrogen, phosphorus and potassium efficiently to optimize nutrient levels to enhance rooting, blossoms, fruit yields and quality.

Use OrganOmex™ Achieve 3-1-3 in addition to a primary fertility program or incorporate your fertility program.
