

Tech Sheet

What is CytOmex™?

CELL POWER® CytOmex™ 0-0-1 is a powerful agricultural product designed to boost plant growth and health. It combines three types of seaweed extracts, rich in natural cytokinins, betaines, trace elements, antioxidants, and plant defense elicitors. This unique blend enhances root growth, manages environmental stress, and improves crop yields and quality.

KEY BENEFITS:

- **Enhances root growth:** Promotes stronger and deeper root systems.
- **Manages environmental stress:** Helps plants cope with drought, heat, and other stressors.
- **Improves crop yields and quality:** Increases the quantity and quality of the harvest.
- **Supports early growth, flowering, and crop sizing:** Boosts development during critical growth stages.
- **Strengthens young plants before transplanting:** Prepares seedlings for successful transplantation.

Rates and Timings:

Application Rate:

- Rate: Use 1 quart per 100 gallon of drench water.
- Timing: Apply at transplanting

This application ensures that young plants receive the necessary nutritional and hormonal balance to develop strong roots and thrive in their new environment.

Additionally, for other crops and stages:

- Foliar/Soil Application: Use 16-32 ounces per acre, applied throughout the growing season as needed
- Post-Harvest: For tree crops, apply as soon as possible after harvest to stimulate root regeneration and prepare for the next season

These guidelines help maximize the benefits of CytOmex™ ensuring robust plant development and productivity.

Please read and follow the specific application and usage guidelines on the label for best results.
