

## Tech Sheet

### What is Damu™?

CELL POWER® Damu™ is a specialized foliar fertilizer featuring boron and molybdenum, designed to maintain elevated nutrient levels throughout the season. This advanced formulation ensures efficient photosynthate movement into developing crops, leading to higher yields and more uniform crop sizes. Ideal for addressing nutrient deficiencies and promoting robust plant growth, Cell Power® Damu™ is a versatile solution for various crops.

### KEY BENEFITS:

- **Elevated Nutrient Levels:** Maintains optimal boron and molybdenum levels for healthy crop development.
- **Efficient Photosynthate Movement:** Ensures effective transfer of photosynthates to developing parts of the crop.
- **Higher Yields:** Promotes increased crop yields and uniform sizes.
- **Advanced Technology:** Utilizes innovative EBA Technology for improved nutrient balance and absorption.

### Rates and Timings:

#### Application Rate:

- General Rate: Use 16 oz per acre
- Subsequent Applications: Apply at the same rate 3 weeks after the first application
- Pre-Harvest: Apply 1/2 gallon per acre 7-10 days prior to harvest

#### Timing:

- Growing Season: Continue applications as needed throughout the growing season

Boost your crop yields and achieve uniform sizes. This cutting-edge foliar fertilizer keeps boron and molybdenum levels at their best, promoting efficient photosynthate distribution and vigorous plant growth. Discover the advantages of innovative EBA Technology for healthier, more bountiful crops.

Please read and follow the specific application and usage guidelines on the label for best results.
