

CELL POWER® Indra™

Tech Sheet

What is Indra™?

Cell Power® Indra™ from OMEX USA is a specialized fertilizer designed to help crops cope with various environmental stresses, including heat, cold, salinity, drought, and intense UV light. It integrates select plant extracts and EBA Technology® to create a unique stress-reducing formulation.

Key Benefits:

- **Stress Resilience:** Enhances plant growth and quality during extreme temperatures and other stress conditions.
- **Antioxidant Boost:** Promotes the plant's own antioxidant production to combat stress-induced toxins (ROS), protecting cell integrity and quality
- **Disease Resistance:** Reduces the incidence and severity of many fungal diseases, and can be tank-mixed with fungicides for added protection
- **Drought and Salinity Tolerance:** Improves crop growth during drought and in conditions with high salinity irrigation water

Rates and Timings:

General Application:

- Rate: 1-2 quarts per acre
- Timing: Apply during periods of stress (e.g., heat, cold, salinity, drought, intense UV light)

Specific Guidelines:

- Initial Application: Apply at the first signs of stress.
- Subsequent Applications: Reapply every 14-21 days as needed during stress periods

These guidelines help ensure optimal crop health and resilience during challenging growing conditions.

Please read and follow the specific application and usage guidelines on the label for best results.

Cell Power® Indra™ is exclusively marketed by OMEX® USA and manufactured by Levity Crop Science.
