

# Cell Power® Protein Plus™ Magnesium 3%

Magnesium is a key constituent of the chlorophyll molecule. Magnesium also improves the plant's utilization of iron. This element is critical in the production and movement of sugar and starches within the plant, as well as aiding in the use of phosphorus in the plant.

**Cell Power® Protein Plus™ Magnesium 3%** contains protein hydrolysates which aid in the formation of proteins within the crop. Foliar nutrition in the form of protein hydrolysates, provides ready-made building blocks for protein synthesis. The protein hydrolysates also aid in the delivery of magnesium to the target tissue when applied as a foliar and/or drip irrigation.

Analysis: 3% Mg  
Density: 10.10 lbs/gallon  
Packaging: 2.5-gal, 275-gal mini-bulk

As a liquid, **Cell Power® Protein Plus™ Magnesium 3%**, plus protein hydrolysates is easy to handle and tank mix without worrying about clogging nozzles. This material may be applied as a foliar or through drip/micro irrigation systems. Use 1-4 quarts per acre, preferably early in the growing season. Apply as needed during the growing season, as tissue and soil sample results demonstrate further need. If you intend on blending this material with other liquid or dry fertilizers, a jar test is recommended to ensure compatibility.

**Quality & Crop Safety is our #1 Goal**
