

Cell Power® Octominor™

Tech Sheet

What is Octominor™?

Cell Power® Octominor™ is a liquid nutrient solution designed to optimize plant growth by providing 8 essential micronutrients. It also includes bovine protein hydrolysate and OMEX®'s Enhanced BioAvailability (EBA™) Technology, making it highly effective for both annual and permanent crops. Contains 1% Nitrogen, 0.5% Magnesium, 3.0% Sulfur, 0.05% Cobalt, 0.35% Copper, 2.0% Iron, 1.0% Manganese, 0.16% Molybdenum, and 0.75% Zinc.

KEY BENEFITS:

- **Comprehensive Nutrient Supply:** Provides 8 essential micronutrients crucial for plant growth and development.
- **Enhanced Absorption:** Efficient uptake with EBA™ Technology.
- **Improved Metabolism:** Bovine protein hydrolysate aids nutrient use.
- **Versatile Application:** Suitable for foliar and soil use.
- **Easy to Use:** Liquid form, available in multiple sizes.
- **Compatibility:** Mixable with other products (test first).
- **Optimized Growth:** Supports plant growth throughout the season.

Rates and Timings:

Application Rate:

- Foliar Applications: Use 1 to 4 quarts per acre.
- Soil Application: Use 1 quart to 2 gallons per acre. Material should be diluted prior to application through any irrigation system. Perform jar test to ensure compatibility with irrigation water.

Timings:

- Early Season: Start applications early in the growing season to address initial nutrient deficiencies
- Growing Season: Continue applications as needed throughout the growing season. The frequency and amount should be based on tissue and soil sample results to ensure optimal nutrient levels
- Specific Stages: Apply during key growth stages such as foliage development, fruit set, and fruit maturation to support healthy crop development

PRODUCT INFO

Please read and follow the specific application and usage guidelines on the label for best results.
